

# BNB GUY

WHITE PAPER

## BNB GUY WHITEPAPER

"Because the world needed one more meme token. And this one vibes harder."

TL;DR

BNBGuy is a meme-fueled, Binance-backed (emotionally, not legally) crypto asset created to serve one purpose: vibe, moon, and maybe Lambo . Powered by the spirit of CZ's lost flip-flop and the tears of PancakeSwap bagholders, BNBGuy aims to revolutionize absolutely nothing — and look cool doing it.

### Mission Statement

"To provide zero utility in the most useful way possible."

BNBGuy is your BNB-brother-from-another-mother. He doesn't solve world hunger, he doesn't bridge chains — he bridges vibes . BNBGuy was forged from the ashes of rug pulls and launched with nothing but a dream and a MetaMask wallet full of hopium.

### Origins

Legend has it, BNBGuy was born when a Shiba Inu bit a Binance intern during a full moon. The intern rage quit and tride to code the BNBGuy contract in a ca ffeine-fueled fugue state which failed epically. The token launched shortly after on pinksale at which point he was fired for using the office printer to mint NFTs of his feet for a private oF.

### Tokenomics

Category	% of Supply	Use
Use		
Liquidity Pool	100%	All tokens start here. Degens can claim, trade, and flex from the pool.
Degens	100% of LP	For the real ones — all the fun comes from the LP.
Team	0%	For the squad that "definitely won't dump"
KOLs / Influencers	0%	Because they will dump
Burn Wallet	0%	Because fire no good 🔥
Marketing / Giveaways	0%	Covered by the chill guy whale, keeping the vibe alive

Taxes: 0% buy / 0% sell / 0% transfer.

Because who likes taxes? Not us. Every BNB GUY trade is smooth, clean, and meme-powered.

### Roadmap

Unlike your last girlfriend, we're not making promises we can't keep.

Ideas List #1:

- ✅ Launch with a meme so strong it makes Doge blush
- ✅ PinkSale presale, because who even uses Uniswap anymore?
- ✅ Raid Twitter like it's 2016
- ✅ Pay influencers who'll ghost us in 2 weeks

## Ideas List #2:

- SOON List on sketchy CEX that hasn't been hacked (yet)
- SOON BNBGuy NFT drop – 10k variations of the same dude in different hats and a car
- SOON DAO proposal to rename crypto “BNBchainz”
- SOON Burn 3 tokens during a live TikTok of someone eating hot sauce while riding a mechanical bull

## Ideas List #3:

- 🔒 Top secret, even we don't know
- 🎤 Maybe a rap battle between CZ and Vitalik (guest appearance commentator is Joe Rogan)
- 🚀 Community votes if we go to the moon, Mars, or Bali

## Utility

Look. It's a meme coin.

The only real utility is the dopamine rush when the chart goes vertical. But if you must:

Community Governance : Every vote is ignored equally.

BNBGuy Merch : Coming soon to a warehouse we haven't rented yet. (Temu)

BNBChatGPTGPT : An AI trained only on crypto Twitter screenshots.

Future Use Case : We might cure the Kardashians with it. Who knows?

## 🔒 Security

Rug-proof? Probably.

Audited? Not yet. But the dev's cousin is “learning Solidity.”

Liquidity burned? Yes — like your ex's bridges, dignity, and leftover hoodie. Gone forever

## 🤝 Partnerships

We're currently in talks with:

- A guy on Telegram named “Elon420”
- CZ's former Uber driver (he runs a channel now)
- A whale who only speaks in GIFs — shoutout Terry, you majestic beast 🐳 🔥

## 📄 Legal Disclaimer

BNBGuy is not affiliated with Binance. Or BNB. Or logic.

This is not financial advice. It's barely advice at all.

Invest at your own risk. Or don't. But if it moons, we told you so.

## 👛 Final Words

BNBGuy isn't just a token.

He's a lifestyle. A movement. A fever dream powered by memes, BNB gas fees, and unrelenting hopium.

So grab your bags, grab your vibes, and remember:

WAGMI... unless we NGMI. In which case, still good vibes.
